Job Description

【About the Company】

Digital creative studio business
・ Business start-up support
Hands-on support for CTO experienced people, UI / UX designers, business consultants, and CFO experienced people for planning new businesses and launching startup companies.

・ Business growth support
A project manager, software engineer and AI engineer will form a dedicated team to support business growth in terms of

service development and operation. In the case of early-stage startups, they also participate in capital.

・ Recruiting support
Supporting the recruiting personnel function centered on introducing core human resources to startups. They also introduce advanced IT human resources who are graduated from the group and are trained through industry-academia collaboration at top universities in Vietnam.

【Job Description】

The company provides a full range of services from service design to technology selection and development for "partners with ideas (originators)".
We have a variety of projects from startups to new business PoC projects for major companies, and you will participate from the 0 → 1 planning stage, from design to development.

Job Details
Create new services that provide new value
Selecting the technology to be used, such as services, tools, etc.
Designing a system that meets the objectives by sharing the objectives with the team.
Agile front-end development
Designing services from an engineer's point of view

The company's Vietnam office is located in Hanoi, and is a graduate of the University of Hanoi.
The company's Vietnam office has more than 1,000 talented engineers, mainly graduates of the Hanoi University of Technology, and about 10 experienced CTOs in Japan. Sun's abundance of engineering resources and its environment of choice for talented engineers make it an attractive place to work.
We believe that in order to create services, business, tech, and creative perspectives need to be properly integrated without being too strong. Sun has a team that believes that it is not a top-down approach, but rather a team of professionals in each field who design and shape the services.
We are currently working with a variety of clients who want to deliver new types of services and value to their clients. Sun is an environment where you can choose what you essentially need to do without restrictions because we are involved in the selection, design, and development of the technology from the very beginning of the service launch.
We have a diverse organization with members from Japan, Vietnam, Peru, the Netherlands, Thailand, and other countries, so we can develop teams with members who have different perspectives, knowledge, and cultures.

Culture and working style
The company encourages a work style that allows individuals to perform at their best. We have introduced a monthly flex system with no core hours, and members from a variety of fields are able to adjust their work hours to suit their private schedules and family situations, or to work remotely.
