Job Description

Company Profile

A solid and well-known financial firm in Tokyo, Japan, is looking for a competent backend engineer (Golang) to assist in designing the most significant common data entities, create dependable and easy-to-use API microservices to provide data and offer a platform-wide effect to many product engineering teams.

The Role

As a senior backend engineer, you will create Golang microservices that expose business-critical data for the firm.

- You will actively develop database schemas, as well as data migration and reconciliation solutions that use numerous source databases.
- You will help design a data ecosystem that supports a variety of query patterns, RDBMS SQL queries, and pub/sub via Apache Kafka.
- You will assist client teams in navigating the integration process for the APIs they develop.

Your Skills

Must to have

- Bachelor's degree in Computer Science, Engineering, or a related technical field.
- Experience in Golang & Experience with microservice development
- Experience with database design and modeling
- Experience developing against a modern RDBMS (MySQL, Postgres, RDS/Aurora, etc.)
- Experience in designing and deploying cloud infrastructure
- Conversational level of Japanese (N3+)
- Experience with backend development with Ruby on Rails or Ruby
- Experience with Kafka or other message broker technologies
- Experience with data engineering - ETL pipelines, data processing jobs, or database administration

Location

Tokyo 23 wards

Salary

9M - 14M JPY

Selling Points

- Location: Tokyo, Japan.
- Remote work: Hybrid/Partial remote with one day of in-office work per week.

Reference Number: 06940-0013017912
