#### Job Description

**Reports To** Head of Product Management, Product Management

**Position Summary:**

This position will make use of knowledge and skillsets of solar inverter product and energy storage experience to provide product management support and coordinate regional technical sales activities, globally, for Canadian Solar String Inverters and residential energy storage products. Position will be a direct communication link with regional salesmen, customers and headquarter personnel abroad to assist with needs and support as defined below:

**Responsibilities:**

- Manage elements of the existing and future CSI product portfolio and its life cycle from strategic planning to tactical activities, including creating, maintaining and updating product roadmaps.
  - o Main product focus: String Inverters and Energy Storage Solution
  - o General Solar System knowledge
- Coordinate and support regional product management activities, specific to the product of focus, to build and leverage unified collaterals and enable sales proliferation for the region.
- Communicate and train customers and sales teams in regards of product details and specifications, product advantages, product applications and product benchmark compared to competitors.
- Research, analyze and draft market requirements for existing and new products by communicating with customers and sales teams, by reading other information sources and transferring these requirements into product and roadmap proposals. Present proposals to internal stakeholders to gain approval.
- Follow codes and certifications as they develop; analyze their impact on the market and specific products; make recommendations to management on how to leverage these developments to CSI's benefit.
- Support headquarter's personnel with local certificates and technical requirements for product development purposes.
- Prepare content and materials for customer visits with sales managers to conduct product presentations, customer training sessions, webinars and customer events.
- Provide and validate content for marketing collateral material such as datasheets, technical brochures, white papers and others.
- Work with the marketing team to launch and communicate new products and their features and measure the introduction and sales success of the existing and new products.
- Ability to travel up to 30% of the time, including international travel.
- Perform other related duties as assigned by management

## Required Skills

### Requirements:

#### Education/Certifications:

- Bachelor's Degree in Engineering; a graduate degree is strongly preferred.

#### Professional Qualifications:

- Minimum 5+ years' experience in product management, in the energy sector or within the PV industry. Experience in Power Electronics, PV Inverter technology, Energy Storage is must. Additional experience in PV project or PV system design and Module Level Power Electronic (MLPE) is a plus.
- Experience with JET certification and technical requirements for Power Electronics products is a must.
- Able to perform project simulation as needed in PVSyst is a plus.
- Experience interacting with sales and business development teams and B2B sales channels, and working experience in direct sales to commercial and industry business is a plus.
- Excellent technical aptitude and ability to quickly learn detailed information about the existing product portfolio and to communicate and answer technical and product related questions and topics.
- Understanding and application of financial product calculation – product cost and product sales price definition, analysis and recommendation.
- Excellent social and interpersonal skills as well as the ability to work with others effectively, locally and also over multiple time zones and different cultures.
- Ability / Willingness to travel (up to 35%, also internationally).
- Articulate with strong writing and presentation skills in person and remotely via webinar tools.

#### Personal Characteristics:

- A dynamic, roll-up-the-sleeves personality, who is able to think quickly and creatively and is results-driven complemented by appropriate process orientation.
- Recognized as a leader who is highly proficient in developing strategies, setting goals, training, communicating, mentoring, allocating resources and fostering a strong, cohesive and effective team spirit.
- A pragmatic businessperson who is comfortable in a collaborative and fluid environment. An individual who is capable of thinking on his/her feet and making sound decisions within compressed timelines.
- An excellent time manager, able to balance multiple projects and prioritize a broad variety of issues, initiatives and objectives concurrently.
- A self-confident, self-starter, team-oriented, high energy with ethics, integrity and finesse.
- Work will be performed in a standard office environment, in front of a computer monitor and will involve sitting, bending, standing, walking, typing, reaching.
