Job Description

★Global company！
We are currently a global company with more than 500 foreign engineers (from 50 countries).

★New graduates are welcomed！
・We have made offers to students who are scheduled to graduate in September 2022 and March2023.
・Many of our engineers are junior level.

★Full trainings！
・Japanese language
・Business manner
・Technical skills etc.

★Skills can be improved by learning new technology！
We have business with more than 300 clients, including major automobile manufacturers, major electronics manufacturers, major IT companies, as well as start-ups, so we can assign you to projects that fit your experience.

There are many projects related to web application development especially using Java, C#, PHP, Python, Node.js, JavaScript (React, Angular, Vue) etc.

Also, there are various roles such as back-end end, front-end, and full-stack. Recently, number of mobile application development using Java, Swift, Kotlin, React Native, Unity, etc. are increasing.

★Project examples！
・Cloud application development on AWS, Azure or Google Cloud Platform(GCP)
・Metaverse and IoT development for smart cities
・Disaster prevention information system and mobile app development

Required Skills

【Qualifications】
・Knowledge and learning experience in programming (Java, C#, PHP, SQL, etc.)
・Bachelor degree or higher in Computer Science, Information Technology (IT), Statistics, or Mathematics

【Preferred qualification】
・Experience in learning AWS, Azure or Google Cloud Platform(GCP)

*Please be sure to attach a resume in Japanese or English when applying.
