■職務内容 / Job Description

Project Physician (PP) is a medical expert who is accountable/responsible for generating clinical development strategy designing clinical development options and delivering successful clinical development programs for AZ assets in Japan. His/Her accountability/responsibility is mainly at project level such as generation of Japan clinical development strategy in

collaboration with Clinical Scientist (CS) by providing expert knowledge as a physician scientist. PP also shares the ownership with CS for any discussions of clinical part of JNDA strategy. PP is also involved in study level activities as needed.

Other important responsibilities include: PMDA/MHLW interaction: 1) Co development of documents for regulatory interactions such as BD for regulatory consultation and 2) Query responses as a medical expert through collaboration with CS. KEE management: PP is responsible/accountable for KEE engagement from R D perspectives including but not limited to group advisory board mtg and 1:1 consultation as local internal medical expert

The measure of success includes: 1) The quality and quantity of medical/clinical deliverables mentioned above for AZ ensures patients access to valuable medicines and 2) Leadership and appropriate behaviors
