Job Description

Overview:

The software QA engineer is in charge of our cloud based application and contributes to improvement of the quality through the planning, executing and reviewing from the wider view.

Key Responsibilities:

- Define the completion criteria of the change in the requirement defining steps

- Collaboration with application developers to define the appropriate test plan
- Creation and execution of detail test plan (e.g. regression, data consistency, response speed, high workload)
- Detail analysis of each test result and statistical analysis of qualitative issue
- Architecture management of auto test environment and improvement planning
- Visualization of test result and explanation.

Requirements:

- Bachelor's degree in IT or equivalent applied experience
- 1+ years of application development (Java, JavaScript, SQL, python)
- 3+ years of quality assurance testing experience
- Experience of build or use of testing automation tools (autify, Jenkins, postman, selenium, appium)
