Job Description

[About the company]

Since its establishment in 1966, the company has worked to strengthen the competitiveness of its client companies by providing higher value-added services that combine superior "people" with the latest "technology".

Today, the company provides services that support its clients' business processes from the perspectives of both cost optimization and sales expansion, in pursuit of operational excellence, in 168 locations in 30 countries and regions around the world, with a focus on Asia.

In addition, in response to the expansion of the EC market on a global scale, the company provides a global EC one-stop service that delivers the excellent products and services of client companies to consumers in 48 countries and regions around

the world. transcocosmos aims to become a "Global Digital Transformation Partner" that responds to changes in the business environment and supports the transformation of client companies through the use of digital technology.

[Job Description]

[Overview]

You will be responsible for the development of the company's CX platform.

Currently, new technologies are being integrated with the marketing research business.

The company is embarking on new business development, including technology-enabled CX research.

For this, they have started to move existing systems and on-premise applications to the cloud, and have begun structuring and modernizing the front-end and back-end.

The company is looking for people who want to expand their front-end and back-end development skills while acquiring knowledge of AWS, GCP, and other cloud services and gaining practical experience!

[Responsibilities]

- AWS and GCP infrastructure operation and maintenance development
- Participation in system modification projects for major client companies
- Participation in front-end and back-end modernization projects

[Job satisfaction/Attractiveness]

They are working hard to provide high value-added CX research services utilizing data and AI. You will be in charge of AWS operations for a major client company and participate in system improvement projects.

You will be in charge of the front line of CX research services.

Depending on your performance, you may be assigned to new service projects, participate in business process planning at headquarters, or work in other more strategic positions. Why don't you join the company and build a high-value career centered on AWS and GCP?

[Working conditions]

◆ Holidays

Saturdays, Sundays and national holidays/two full days off per week

Commuting allowance (up to 50,000 yen per month)

Social insurance

Retirement allowance system (defined contribution pension plan)

Employee stock ownership plan
