Job Description

【About the Company】

The company's brand message is "We are happy to work with this team all over the world." They continue to develop and provide services based on our brand message, "We want to increase the number of people and teams who can enjoy their work."

With offices not only in Japan but also in the United States (New York), Singapore, and the Netherlands (Amsterdam), the company promotes its business in a global environment.

The company currently operates the following four services.

①Project/Task Management Tool

It is a tool designed to make projects fun and facilitate communication within a team. It was originally developed to facilitate communication with clients and create a more comfortable working environment for ourselves when we were in the business of contracted development. It is a project management tool that supports the work of many people.

②Service for easy creation and sharing of graphics

Share your mind with each other in real time while using figures.

This service makes it easy to create and share figures on a web browser.

Since its launch in 2009, this service has been used by many users. The service is used not only in Japan, but also in Colombia, the U.S., France, Taiwan, and other countries, making it a global service with about 90% of its users outside Japan.

③Business Chat Tool

A business chat tool that turns chats into ideas. It is designed to make communication between team members more enjoyable and smooth, and by using it in conjunction with Backlog, work can proceed more smoothly by separating the tools for "flowing conversations" and "tasks to be kept in check".

④Services to enhance security and governance

Enhance security and governance when using the company's services.

It provides integrated account management with managed accounts, single sign-on with SAML authentication, and audit logs to record the operations of members of your organization.

[Job Description]

The company develops and provides multiple services in order to "create "I am glad to work with this team" all over the world.

The company, which has three services, has reviewed the SRE work that was done for each service and started the "SRE Section" in 2019 to conduct improvement activities across services. This time, the company is looking for a new member for the Web Operation team, which is responsible for improving the operation of Backlog, the company's oldest service.

By recruiting members necessary for operational improvement, the current team structure will be divided into two teams: one team to focus on Backlog, a product directly related to reliability improvement, and another team to handle audit, ISMS, security, and interruptions. After dividing the team into the offensive and defensive teams necessary for operational improvement, the roles will be rotated in 6 months to raise the skill level of all members.

[Responsibilities]

Development and operational improvement of the project management tool "Backlog"

- ◇ Work related to design and construction of infrastructure
 - ・ Improvement of storage fault tolerance
 - ・ Support for application architecture from the perspective of service reliability
 - ・ Continuous improvement and optimization of infrastructure architecture
 - ・ Continuous improvement of security
 - ・ Continuous improvement of operation and monitoring system
- ◇ Tasks related to company-wide common initiatives
 - ・ Establishment and maintenance of teams for stable operation of Backlog / Cacao / Typetalk / Nulab Apps
 - ・ Knowledge sharing and deployment through product collaboration

Even if you live out of reach of the company's offices in Fukuoka, Kyoto, or Tokyo, please apply as well.

The recruitment and selection process is also based on online applications.

[Working conditions & treatment]
