Job Description

Join a dynamic team to build and maintain mission-critical API services, focusing on CI/CD pipeline improvement and Infrastructure as Code. Support global operations and enhance service stability and performance.

Client Details

Our client is a leading global tech company, renowned for its innovative solutions and commitment to excellence. They provide a collaborative environment that fosters professional growth and development.

Description

- Build and maintain CI/CD pipelines for API services.
- Develop "Infrastructure as Code" for multi-environment deployments.
- Enhance stability and performance across various environments.
- Promote and implement DevOps best practices.
- Improve monitoring and alerting systems.
- Provide troubleshooting support during on-call rotations.

Job Offer

- Opportunity for professional development.
- Work on innovative projects with global impact.
- Collaborative and inclusive work environment.
- 9:00-17:30 work schedule.
- Free meals for breakfast, lunch, and dinner.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

Required Skills

- At least five years of experience in DevOps.
- Proficient with Docker, Kubernetes, and CI tools like Jenkins.
- Experience with configuration management tools such as Ansible or Terraform.
- Skilled in one or more programming languages like Java, C/C++, PHP, or Ruby.
- Familiar with public Cloud platforms like Azure or AWS.
- Strong knowledge of network security management.
- Business-level English; Japanese language skills are a plus.

Company Description

Our client is a leading global tech company, renowned for its innovative solutions and commitment to excellence. They provide a collaborative environment that fosters professional growth and development.
