Job Description

【ABOUT THE COMPANY】

Sale of safe foods and food ingredients, such as organic vegetables, specially cultivated agricultural products, and additive-free processed foods, to the general public through websites and catalogs.

In 2017, two companies merged their businesses, and in 2018, another company was added to create a group. The company is taking a leap forward in a sustainable society by providing a service that allows many people to enjoy a better diet and by creating a system that rewards and makes producers of good food proud.

The company's main business area is a value-propositioned food e-commerce business, such as meal kits that meet the needs of busy customers, such as organic and specially cultivated fresh food, processed food with minimal additives, and other products that are safe and secure. In addition, they are solving social issues related to food through our business, such as wholesale of foodstuffs to nursery schools, consulting and media business using our e-commerce know-how, and mobile supermarkets that serve as infrastructure for living in depopulated areas.

Now that the company has entered its second decade of business, it will continue to provide a better dietary life for producers and customers through new initiatives and tricks, such as strengthening the products and services of each brand, establishing a new large-scale distribution center, and building a logistics system.

【JOB DESCRIPTION 】

《Recruitment Background》
The food delivery e-commerce service "Oisix" launched its iOS app in 2015 and its Android app in 2017. Currently, there are approximately 400,000 members for the service, more than half of whom use the app to make their weekly purchases. The company is looking for an Android App Engineer to work with us to evolve the smartphone app in order to provide a better customer experience.

《Department》
You will be assigned to the "Android Section" of the Oisix Development Department in the Software Engineering Division. Currently, there are four application engineers in the Oisix Development Department, and many members are involved as outsourced workers. Senior members will support you during the unfamiliar period immediately after joining the company. In addition, many of the engineers work mainly remotely, and the company also provides a remote work environment.

《Your Role》
Currently, they are working to improve UI/UX based on the concept of "frictionless" so that customers can shop without stress. In addition, they are working to improve quality through refactoring in order to increase productivity in application development and to apply design patterns in line with the times. Based on these policies, you will work on the development of new functions and UIUX improvements.

《Technical Environment》
・Development language: Kotlin
・Development environment: Android Studio, CI/CD, Bitrise
・Design tool: Adobe XD
・Others: GitHub, Slack, GitHub Actions

《Career Path》
First, you will be expected to expand the scope of your role as an Android App Engineer for Oisix. In the future, you will develop your expertise as an app engineer and lead the development of smartphone apps for Oisix La Daichi's various services.

【Welfare】
Full social insurance
Commuting allowance
Medical checkup
Remote work and shortened hours on request
　※Many mommy and daddy employees also work there.
Sidelines OK
Clothing optional
Employee discounts are available
Two days off per week (Saturday and Sunday)
※Depending on the situation, you may be required to work either Saturday or Sunday, but you will be asked to take a day off.
There is a space for napping
Free space (free to use for lunch and rest)

【Holidays】
Saturday/Sunday/National Holiday
Annual Paid Leave
New Year Holiday
Parental Leave
Nursing Care Leave
Congratulations & Condolence Leave

Required Skills

【Required】
・3+ years of experience developing native applications for Andorid
・Experience in team development
・Experience in development with architectures such as MVVM and MVP

【Preferred】
・Experience developing native apps for iOS
・Experience in automation using CI/CD
・Experience in continuously improving products based on user feedback such as behavior logs and interviews

· Experience managing a team of engineers

【Ideal Applicants】
· Empathy with the company's corporate philosophy and the Oisix philosophy
· Teamwork oriented and able to work tenaciously with others to achieve the mission.
· Able to organize/define requirements and make proposals on your own
· Able to work with a customer perspective and a business growth perspective
