Job Description

【About the company ...】

Listed on the first section of the Tokyo Stock Exchange, the No. 1 engineering staffing service in the industry in terms of sales share
****
The company is one of the largest engineering staffing service groups in Japan with more than 10,000 engineers, and was

created on July 1, 2014 through the merger of four engineering staffing service companies. As a member of the group, the company provides high quality services for a wide range of IT-related projects.

■Abundant Projects
The company has more than 800 business partners, and there are plenty of projects where each engineer can demonstrate his or her abilities.

■Rich training system
The company is committed to human resource development. The training center offers a menu of more than 100 courses, including trend technology training and management training, to support the development of skills that meet the objectives of each individual.

■Career Design Advisors
Each of the company's branches has a Career Design Advisor who can help engineers with their career concerns. "Most of the Career Design Advisors are also former engineers, so they can provide solutions based on a thorough understanding of the situation and the engineer's ideas.
