Job Description

[About the company]

Since its establishment in 1966, the company has worked to strengthen the competitiveness of its client companies by providing higher value-added services that combine superior "people" with the latest "technology".

Today, the company provides services that support its clients' business processes from the perspectives of both cost optimization and sales expansion, in pursuit of operational excellence, in 168 locations in 30 countries and regions around the world, with a focus on Asia.

In addition, in response to the expansion of the EC market on a global scale, the company provides a global EC one-stop service that delivers the excellent products and services of client companies to consumers in 48 countries and regions around

the world. transcocosmos aims to become a "Global Digital Transformation Partner" that responds to changes in the business environment and supports the transformation of client companies through the use of digital technology.

[Job Description]

You will mainly be responsible for the development of applications for smart devices.

It is not about creating what you are told to create, but about materializing what the customer wants and giving shape to ideas.

- 1) Development of applications for smartphones and tablets for client companies (BtoB, BtoC)
- 2) Planning, information design, and design of various applications
- 3) Project management (schedule management, etc.)

[Development Examples]

- Household account bookkeeping application for a bank
- Property search app for real estate companies
- AR application
