Job Description

Position: Power electronics development or industrial PC development

Location: Hitachi City Omika

Language: N2 and above

Job Description:**Responsibilities:**

- Design and develop [Power Electronics or Industrial PC] hardware, including schematics, PCB layouts, and BOMs.
- Perform circuit simulations using LTspice or similar tools to validate designs.
- Utilize hardware verification tools (oscilloscopes, etc.) to test and debug hardware prototypes.
- Collaborate with other engineers and technical teams to ensure project success.
- Document design decisions, test results, and other technical information.

Required Skills

Qualifications:

- Bachelor's degree in Electronics Engineering or a related field.
 - Minimum of 5 years of experience in electronic circuit design (experience in both analog and digital circuits is preferred).
 - Should have experience in Power Electronics (DCDC/inverter) design or experience in Industrial PC hardware development
 - Experience in circuit design and development of in-vehicle devices is additional plus
 - Proficiency in circuit diagram CAD tools.
 - Experience using LTspice or similar circuit simulation software is preferred
 - Strong understanding of electrical principles and components
 - Excellent analytical and problem-solving skills.
 - Ability to work independently and as part of a team.
 - Strong communication and interpersonal skills.
-
