Job Description

Position: Structural Design Engineer

Location: Nagoya

Language: Bilingual

Job Description:

- Responsible for designing and examining the body structure of a flying car (manned drone).
- Flying cars require a combination of various components such as power electronics, batteries, electrical equipment (flight control, lighting, etc.) to be made into a lightweight, small, and safe aircraft. In this position, you will lead the consideration, design, and verification of the structure and strength of the aircraft frame based on the concept model, basic design requirements, and design data.

Required Skills

Required Skills

- Experience in structural and strength design of aircraft, helicopters, etc.
- Experience in design using composite materials (CFRP)
- Experience in design using 3D-CAD

Desired profile

- Able to flexibly accept the opinions and ideas of others and work hard to achieve goals
- Able to think independently and get things done while checking with superiors
- Able to approach things in a bright and positive manner

Company Description
