Job Description

We are seeking a Japanese-speaking Full Stack Developer (mid level/senior level/manager level) to lead the development of both front-end and back-end solutions, integrating services and APIs to deliver top-notch software for our clients.

Client Details

Our client is a US-base leading provider of digital and cloud services, recognized globally for their expertise and commitment to innovation. With over 60,000 professionals in 26 countries and over 1,400 employees in Japan, they are dedicated to making a genuine human impact through technology and design-led experiences. The company fosters an inclusive environment where employees can thrive and contribute to meaningful projects.

Description

- Design, implement, and deploy application architectures tailored to web app or mobile app development projects.
- Lead the team in making optimal technical decisions, defining design guidelines, and ensuring compliance with architectural standards.

- Create and validate architectural prototypes, develop and deploy development standards.
- Continuously analyze and review current technology environments, proposing improvements.
- Stay updated with the latest technologies and industry trends, and drive their adoption.
- Support team members in adhering to architectural decisions and design guidelines.
- Manage client and team expectations, providing explanations and persuasive arguments for architectural decisions.

Job Offer

- Work with a global leader in Microsoft technologies, with access to extensive resources and training programs.
- Opportunity to earn recognized certifications and advance your career in a supportive environment.
- Engage in challenging projects that make a significant impact on clients and society.
- An environment and work culture with a high degree of personal discretion, including work styles.
- Other extensive employee benefits such as flexible remote work, 401k, self-improvement budget, etc.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Mana Chuabangon +81 3 6627 6080.

Required Skills

- Minimum 5 years of experience in application architecture design, implementation, and deployment for web/mobile apps.
- Proficiency in at least one of the following: React, Angular, Vue.js, Swift, Kotlin, or Flutter.
- Experience with cloud technologies (Azure, AWS, GCP) and API development using C#, Node.js, Java, or Go.
- Leadership experience, including team lead or sub-lead roles with strong negotiation skills.
- Business-level proficiency in Japanese (JLPT N1 preferred).
