Job Description

[About the company ...]

<Main Business>

Consulting, testing and development business with a focus on software "quality"

<Company profile>

The company specializes in quality assurance and testing, which are essential for software development. In order to deliver safe and secure products to the world that is full of software products and can no longer exist without them, they have developed a unique business model to provide quality assurance services across the board, including consulting in the

upstream process of development projects, development work with an awareness of "quality", and testing work just before product release.

They are involved in a wide range of products and services, including enterprise domains such as finance and distribution, and entertainment domains such as web and games, and they participate in projects as a primary contractor under direct relationships with user companies.

In the blue ocean market, where there are no competitors, they continue to achieve an annual sales growth rate of approximately 150% and are creating a virtuous cycle in which employees are rewarded with challenging work and results.

From 2019, the corporate tagline will be "We will show you the change of common sense," and they will be a growing company that is always focused on change and improvement.

[Job Description]
