Job Description

【ABOUT THE COMPANY】

Global virtual currency aims to become a blockchain platform

A comprehensive platform that includes virtual currency exchanges, exchanges, and peripheral services, and is still young, established in January 2014, but has raised approximately 4 billion yen in funding and has over 2 million users. The company is the only exchange in the world with licenses in Japan, the U.S., and Europe (*According to our research).

In addition, the company is responsible for the planning, design, development, and operation management of services using

blockchain technology, as well as the planning, design, development, and operation management of web services and applications.

In the future, the Group will continue to unite to create innovation in the FinTech area, aiming to provide the world's leading services and technologies for both virtual currency and blockchain.
