#### Job Description

The Program Manager/Delivery Lead will manage several IT projects, work with Project Managers to deliver high-quality solutions that meet business needs. Ensure optimal project delivery through effective change management, communication, and issue resolution. This is a global leading pharmaceutical company in Kobe, Hyogo.

#### Client Details

This a Japan subsidiary of leading US pharmaceutical company. The company has a strong presence in the Japanese healthcare market and Japan headquarter is located in Kobe. The company specializes in research, development, and distribution of innovative medicines, with key therapeutic areas including diabetes, oncology, immunology, and central nervous system disorders.

The organization is committed to improving patient outcomes through advanced research and development, often collaborating with Japanese academic institutions, research organizations, and healthcare providers. With a strong focus on patient safety, ethical practices, and strict adherence to regulatory standards, the company has earned a reputation as a reliable partner in the Japanese pharmaceutical industry.

With a workforce of around 1,000 employees in Japan, the company is dedicated to delivering high-quality pharmaceutical products and contributing to the overall advancement of healthcare in Japan.

### Description

- Lead the execution of several IT projects within budget and on schedule.
- Translate business needs into technical requirements.
- Manage vendor resources to ensure quality delivery.
- Introduce innovative IT capabilities to support business transformation.
- Continuously assess and improve project management practices.

### Job Offer

- Competitive salary based on experience.
- Comprehensive benefits, including housing allowance, medical care, flexible working hours, and more.
- Opportunities for remote work and a supportive environment for career development.
- Work in diverse and global environment.
