#### Job Description

**【About the Company】**

The company operates a technical outsourcing business based on the principles of "Creating 'Shining Joy!' and "Contribute to people and society with the pride of a Only One company".

The company has partnerships with some of Japan's leading manufacturers, and its business performance is growing steadily.

The company is rapidly expanding its organization with a view to going public within 2 to 3 years through Monozukuri x Human Resources, and although it currently has 700 employees, it will further accelerate its growth from here with a view to going public.

The company aims to "continue to be a group of highly skilled engineers who are always needed."

The growth of engineers is the growth of the company, and the company as a whole has continued to create a system to support that growth.

The company will continue to aim for sustainable growth as an innovative company that supports not only the manufacturing industry but also the development of local communities and contributes to the realization of affluent lifestyles for people, so that all employees can be proud of being and remaining a company that supports Japan's technology.

## **[ Job Description ]**

■Location: Nagasaki / Kumamoto / Oita **[Overview]**

**[Overview]**

Semiconductor Process Development (Integration)

**[Specifically]**

Realize commercialization of products that meet customer requirements on schedule and implement technology incorporation with a view to mid- to long-term development. In cooperation with the process development department, you will use the latest technology to realize structures that meet the required specifications and requirements.

\*You will be assigned to a job depending on your past experience and wishes.

(Scope of change) All technical duties, job titles, and operations as defined by the company.

### ▼ Attractiveness of this position

This is a job to develop manufacturing methods to realize next-generation semiconductor products.

You can become a specialist in each process and have many opportunities to interact with people outside the company to gain stimulation. You can make use of your prior experience in electrical and electronics, physics, physical properties, materials, and chemistry.

### ▼ Working Area

For the time being, you will work in the local area and aim to become a professional.

After that, depending on your own wishes and career development, you may be able to take on the challenge of working on other projects or in other positions, or you may become a specialist in a specific field.

The company places great importance on providing an optimal work environment that is tailored to each individual's career.
