Job Description

[About the Company]

The company develops and manages "AmpliTalk," a sales enablement tool that automates online business negotiations. "AmpliTalk" is a SaaS product that automates coaching and boosts team performance by automatically entering and transcribing online business meetings into SFA for analysis. The company aims to realize "a world where people are empowered through conversations" by using software to streamline and eliminate unnecessary work, and by using software

to do what people have been unable to do until now.

【Job Description】

You will be responsible for building the infrastructure to continuously improve ML models and deploy them to the product, working closely with ML engineers, and your duties will range from building a machine learning pipeline using AWS infrastructure to maintaining CI/CD/CT. The main mission of this position is to deliver fast and stable ML services to users.

Language (Machine Learning) : Python
Language (backend) : Python, TypeScript
Machine learning library : scikit-learn, PyTorch
Infrastructure : AWS
Code management : GitHub
CI : GitHub Actions

【Working conditions & treatment】

Flextime System

- ・ Saturday/Sunday/National Holiday
- ・ Annual Paid Leave (3 days when joining the company)
- ・ New Year Holidays

- ・ Full Social Insurance
- ・ Commuting Allowance

Required Skills

【Required】

- ・ 1+ years of experience building with multiple services on the cloud (AWS, Azure, GCP, or one of these)
- ・ 1+ years of experience developing ML models
- ・ Japanese: Able to communicate well in Japanese
- ・ English: No hesitation (as there are many foreign engineers)

【Preferred】

- ・ Experience in building and operating MLOps
- ・ Experience in back-end development
