Job Description

[About the Company]

■Business description: DX solution business using cloud technology, data and AI

■Business Details:

Biz & Tech & Creative

The company provides one-stop IT consulting and cloud computing services ranging from service planning, UI design, and app development to the construction of cloud and voice infrastructure, and the implementation of solutions such as BI and RPA. The company has three domestic offices in Shibuya, Osaka, and Nagoya, and is also developing its own services such

as FAQ chatbots.

[Job Description]

■Recruitment Background

The ratio of young members is high and there are few leaders who can manage the entire development process, so there is a shortage of human resources to respond to the inquiries received.

The company is looking for members who are willing to become leaders over the medium to long term, even if they cannot become leaders immediately.

■Responsibilities

You will be mainly involved in front-end proposal, requirement definition, design to development in web application development projects for our clients.

With front-end technology as a selling point, they mainly obtain prime (first-tier contracting) or projects in which they can exercise their technical discretion.

This is a professional service that provides value to customers through both communication and implementation technologies. You will listen to the requirements of the client, propose concrete solutions, and implement the solutions.

■Technology Used (Examples)

TypeScript / JavaScript

CSS (Sass)

HTML

React (Next.js)

Vue.js (Nuxt.js)

Storybook

Node.js (Express)

PHP (Laravel)

■Good points about the team

An environment where you can learn front-end technologies with high market value.

Modern technologies (Next.js, Nuxt.js, TypeScript...) We are actively adopting modern technologies (Next.js, Nuxt.js, TypeScript...).

Value the fundamentals so that you don't end up just "being able to work with frameworks."

There are many opportunities to communicate directly with customers, and you can utilize/develop your proposal and problem-solving skills.

It is very rewarding to be able to realize the real value of what we provide.

There are opportunities to collaborate with members of various skill sets, including designers and engineers in the server-side and cloud infrastructure areas.

You can discuss implementation methods with server-side engineers, discuss logical information design with designers, and so on.

This is a position that requires (i.e., can utilize and learn from) a wide range of knowledge and perspectives, while maintaining a front-end focus.

■Work Location

Mainly at home or at the headquarters office.

In rare cases, depending on the project and process, you may be stationed at the client's site.

■Project Examples

New uniform sales service development for an online business

Development of a new office rental service for an online business

Development of an academic achievement test score analysis service for an education company

Development of a new DX service portal site for the construction industry

Renewal of a job site for a group company in the human resources industry

Renewal of merchant management screen for payment service provider

New online lesson service for English conversation education provider

New wedding planning service for wedding industry

Renewal of no-code development service for system integrator

[Working conditions & treatment]

■Holidays / Vacations

- 2 days off per week (Saturday and Sunday)
- National Holidays
- Entrance leave *Two days of special leave are provided at the time of entry into the company
- Summer vacation
- Year-end and New Year vacations
- Celebration or condolence leave

■Welfare

- Qualification Acquisition Support System
- In-house recruitment system
- Multi-track personnel course conversion system
- Communication expense payment system
- Employee Stock Ownership Plan
- Wedding and maternity gift program
- Annual, semi-annual, and monthly MVP awards system

■Various insurances

- Health insurance, employee pension, unemployment insurance, workers' accident compensation insurance, etc.
 - Social insurance: Kanto IT Software Health Insurance Association
-

Required Skills

[Required]

3+ years of experience in front-end or server-side web development

Experience in JavaScript development

Communication with customers regarding requirements and specifications (any level of granularity is acceptable)

[Preferred]

Experience as a project leader in web development

Experience in progress management and training of members, junior members, and subordinates

Experience in development using frameworks such as Vue.js / React / Angular

Output to blogs, etc.

*No experience in the design field is required as this is an engineering position.

[Ideal Applicants]

Able to build a team together

Not afraid to communicate spontaneously with colleagues and customers

Company Description
