Job Description

【求人No NJB2259174】

What you will do :

The Planning Manager is responsible for providing leadership and guidance on demand and supply planning processes developing appropriate planning processes and systems and partnering cross functionally to develop solutions to a variety of problems. You will also be responsible for managing staff and building effective relationships with key suppliers and internal/external client groups:

Key Responsibilities :

- Drive 50:50 Forecasting and IBP processes within franchise team partnering with other key stakeholders in Demand Management and AP supply chain to achieve optimal outcomes for the franchise.
- Ensure that IBP contributes to a robust sales and marketing business planning process.
- Ensure all key stakeholders within the business franchise are knowledgeable and compliant regarding key processes that contribute to customer service within the business.
- Drive the forecast review process within the franchise team partnering with other key stakeholders in Demand Management and APSC to achieve optimal outcomes for the franchise.
- Collaborate with the local Sub Con Planner to ensure optimal customer service and inventory outcomes for locally reworked product.
- Identify and drive tactical intervention opportunities for APSC and the business resulting in service recovery in instances where customer expectations would otherwise not be met.
- Analyze reasons for service failures. Recommend and drive initiatives to prevent future occurrences.
- Agree appropriate safety stock parameters with regional SC to ensure customer service levels are met with responsible levels of inventory.
- Systematically review inventory related opportunities with the business to ensure that the business derives maximum financial return on its inventory.
- Partner with NPI project management and APSC team to ensure timeliness of completion of NPI executions.
- Serve as the Supply Chain representative within the relevant JP Franchise Team.
- Collaborate and partner with other functional representatives to develop franchise strategies initiatives and goals that are congruent with overall business strategies.
- Communicate with APSC to drive supply chain capabilities against the business priorities and with the business to ensure congruence of demand generation activities with supply chain capabilities.
- Lead and manage a team of professionals to ensure successful execution of plans
- In partnership with own manager take personal accountability for own professional development.
- Develop subordinate/s and other members within functional team to produce capable supply chain managers for the future.

Required Skills**Required Qualifications :**

- Bachelor's degree or equivalent in Industrial Engineering Business Administration Supply Chain or a related field
- 8-10 years of experience in a related field
- Minimum of 2 years of direct management experience
