Job Description

As a Senior Product Manager, you will be responsible for Product Feature Management (PFM) with a high sense of urgency.

[Detailed Responsibilities]

- Understanding customer needs and requirements definition
- Defining key points for customer inquiries
- Prioritizing projects
- Planning unique product concepts (and mapping out a long-term roadmap)

[Short-Term]

- Understanding specifications of existing products
- Capturing the requirements from the business team
- Preparing PRDs and requirement definitions
- Driving project progress
- Formulating product policies and strategies
- Creating reporting materials for internal stakeholders
- Conducting customer interviews to validate product-market fit

[Mid-to-Long-Term]

- Creating mid-to-long-term product roadmaps
- Leading product development by presenting strategies to the entire product development team
- Developing business plans for the product

Strategic Impact: Directly influence the company's product strategy, closely collaborate with the executive team, and lead the business direction.

Innovation: Engage in product development leveraging the latest AI technologies and gain experience at the forefront of the industry.

Collaboration: Work with a diverse team of software engineers, designers, and infrastructure specialists, gaining a broad skill set.

Ownership and Challenge: Take ownership of the entire product lifecycle and achieve a sense of accomplishment by solving project challenges through creativity.

Career Growth: Enhance strategic thinking and leadership skills by developing mid-to-long-term roadmaps and business plans.

Required Skills

- 4+ years of experience in product management or project ownership in product development
- Experience creating PRDs and product roadmaps that consider market impact
- Customer research and market analysis experience
- Strong leadership and logical communication skills; ability to collaborate, coordinate, and work with various stakeholders (e.g., engineers, designers) to drive product success
- Ability to quickly adopt the latest AI technologies and industry trends for business applications
- Strategic decision-making skills based on data analysis
- Business level proficiency in either Japanese or English

- Experience managing products with a large user base
- Certification or equivalent knowledge of cloud platforms (AWS, Azure, GCP)
- Knowledge of NLP technologies like GPT, LaMDA, BERT
- Practical experience with Python or TypeScript
- In-depth knowledge and practical experience with Generative AI and Transformer models
