### Job Description

#### Summary

Randstad is partnered with a global insurance firm, in their search for a "Full Stack Developer" for their Systems Engineering team. The team will lead the effort on developing a strategy to exit multiple existing applications on the mainframe environment, building new cloud-ready applications in an open source environment. Your role as a full-stack developer will be to support the design, development, and deployment of web apps, mobile apps, and API of a prototype application to be utilized as a Proof of Concept for the future migration of existing applications. You will participate in each stage of development to ensure a successful delivery, including driving the solution design, implement, testing, and supporting the deployment into production.

#### Responsibilities

- Implement, test, deploy, maintain, and troubleshoot core business applications, including
  - API & DB, optionally UI, API integration and mobile development
  - Meet and coordinate with internal and external stakeholders to establish project scope, system goals, and requirements
  - Ensure code quality of development by regularly performing code reviews to follow best practices
  - Create deployment procedures, monitor systems health, gather system statistics, and troubleshoot reported errors and alarms
  - Implement best practices for scalability, reliability, maintainability, and performance
- 

## Required Skills

### **Must Have Skills**

- Bachelor's degree in computer science or information technology, or equivalent experience
- 5+ years of experience working with information technologies and software engineering
- Working knowledge of Java and ability to build batch applications from design documents in an open source environment
- Ability to support/troubleshoot an incident
- SQL
- Spring Boot
- Azure Batch, Azure Kubernetes, other Azure technologies

### **Good to Have Skills**

- Ability to design and implement a solution from high level requirements
  - Ability to understand a system from the source code
  - Life Insurance Domain Knowledge
  - Thymeleaf, ReactJS, Bootstrap
  - Certain amount of experience in HTML, CSS, JS
  - Bilingual – English and Japanese
  - Experience working in an Agile environment
  - Experience working with build automation and CI/CD tools, Azure CI/CD
  - 5+ years of experience working with information technologies and software engineering
  - COBOL knowledge – experience in mainframe systems development, testing and debugging
-
