#### Job Description

The role involves developing and optimizing high-traffic web applications, focusing on building scalable, maintainable, and high-performance front-end solutions using React, Redux, and TypeScript. The position requires over 5 years of experience in front-end development, with expertise in web technologies and a strong focus on improving user experience and application performance.

#### Client Details

The client is a prominent player in the digital services industry, managing a high-traffic platform used by a diverse global audience. They are dedicated to delivering cutting-edge, reliable systems, with a strong emphasis on optimizing UI/UX to ensure seamless user experiences and maintaining scalability and stability during peak usage periods.

#### Description

- Develop and maintain scalable, high-performance front-end applications using React, Redux, and TypeScript.
- Optimize web application performance to ensure a seamless user experience for high-traffic platforms.
- Collaborate with designers, backend engineers, and product managers to implement technical solutions that align with business goals.
- Participate in code reviews, ensuring adherence to best practices and maintaining code quality.

- Continuously improve front-end architecture and contribute to the adoption of new tools and technologies.

### Job Offer

Long-term renewable haken contract with full employment insurance.

Very high Potential to covert permanent employee in the future

Competitive salary

Attractive benefits

International work environment

Work hours: 9:00~17:30 Monday to Friday
