Job Description

Leading and executing all aspects of the planning, budgeting and analysis functions including:

- Development and construction project cost control including tracking of actuals, commitments, budgets, forecasts, transfers, variances and associated commentary and reporting.
- Cash forecasting and funding drawdown processes.
- Partnering with department leads to understand, track, and refine commitments, spending pipeline and WIP from key vendors.
- Provision of ongoing reporting and analysis to managements.
- Management reporting for development and construction projects

Work with Singapore Finance team for consolidation and investor reporting.

Review monthly JGAAP financial statements prepared by accountants as necessary.

Support to the wider finance team as and when required.

Be assigned in ad hoc project such as instalment of a new accounting system and enhancement of internal control, reporting and general finance support to investments team and CFO.

Required Skills

- 5 years experience in asset management
- Independent and critical thinker with strong analytical ability and attention to detail.
- Interpersonal skills and the ability to confidently interact with senior management and colleagues.
- Familiarity with financial models, preferably with experience in developing financial models directly.
- Proven commercial acumen and industry experience.
- Highly numerate with strong Excel skills, experience with data visualization tools including PowerBI strongly preferred.
- Experience with and/or willingness to upskill with cost management/project tracking.
- Excellent written and oral communication skills.
- Ability to work effectively in a team environment and independently to achieve optimal results.
- Interest in the renewables sector and desire to develop career within the finance function.
