### Job Description

**Company Overview**

Our client is part of a 300-strong global delivery network, supporting around the globe. Their employees collaborate with teams in Japan, India, Portugal, and the US, servicing customers worldwide and working on a huge variety of projects. From cloud migration to digital modernization and advanced analytics, offering operational excellence, agile delivery, and plenty of energy to work on huge transformation projects for our customers.

**JOB DESCRIPTION**

- The Japanese Speaking Project Manager should be adaptable to navigating complex project requirements and be prepared for occasional travel to Japan for client and stakeholder meetings.
- Responsibilities include coordinating with cross-functional teams, overseeing project milestones, and ensuring deliverables meet quality standards.

**JOB REQUIREMENT**

- Proficient in software development project management.
- Proficiency is the application of knowledge, skills, tools, and techniques to project activities to meet project requirements.
- Agile knowledge and experience are mandatory.
- Possess excellent communication skills in Japanese, with a minimum of N2 level proficiency, although N1 is preferred.
- Have at least 4 years of experience in managing software development projects and at least 2 years of working experience with Japanese clients.
- Willing to learn/understand the Energy domain.
- Good English is a plus.
- PMP Certificate is preferred.
