## Job Description

This position reports to the Engineering lead and will be part of the growing Technology team. The successful candidate will be diligent with a proven track record in Full-Stack Software/Backend Development.

## Client Details

This company is a leading provider of flexible work space solutions, offering a range of co-working spaces designed for freelancers, start ups, and larger enterprises. It has expanded to many locations worldwide, transforming traditional office environments into collaborative and inspiring work-spaces that cater to diverse business needs.

## Description

- Build high-performance RESTful-APIs and backend services

- Design and enrich relational databases (MySQL) for efficiency and maintainability
- Collaborate with other teams such as Global/ Product/ Design teams to not only develop but also help define and optimise the products
- Troubleshoot and improve existing applications with a strong focus on backend logic
- Ensure code quality through documentation, code reviews, and testing

#### Job Offer

- Working hours: 9:00-18:00
- Competitive salary, comprehensive employee benefits package, and hybrid workplace (about 2-3 days remote working)
- Potential career growth for engineers with highly self-motivated candidates
- Very beautifully designed office at Nogizaka
