Job Description

- This role involves managing cloud-related projects and products, overseeing task and progress management, and handling accounting and server resource allocation.
- You will also work on reporting, budgeting, and supporting the operational growth of services within the container platform group.

Client Details

- The client is a leading global tech company known for its vast ecosystem of over 70 services, spanning e-commerce, fin-tech, digital content, and more.
- They focus on driving innovation and delivering high-quality services, with a commitment to creating a connected and seamless digital experience for users worldwide.
- The company operates at the forefront of cloud computing, using cutting-edge technologies to empower businesses and enhance the customer experience across multiple industries.

Description

- The key responsibilities of this role include managing tasks, projects, and products within the Container Platform

Group, overseeing the planning, progress, and risk management of projects, and ensuring effective communication across teams.

- The role also involves accounting tasks such as generating billing reports, forecasting and adjusting server resource allocation, and supporting budget planning, while also handling general non-engineering tasks like responding to user inquiries and managing daily operational tasks.

Job Offer

- The flexibility to work from home one day a week, promoting a healthy work-life balance.
- Competitive, negotiable salary.
- The opportunity to work in an international environment, collaborating with team members from across the globe.
- The chance to contribute to a cutting-edge company, driving innovation in cloud services and technology.
- Exposure to advanced cloud technologies, such as Kubernetes and in-house cloud platforms, with the potential for professional growth and development in the cloud space.
- Fast-paced work culture, offering a variety of projects and challenges.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Tom Emms on +81 3 6402 1596.

Required Skills

- The ideal candidate for this role is someone with strong project and product management skills, capable of overseeing both technical and non-technical aspects of cloud-based services.
- They should have experience with cloud platforms (such as Kubernetes or similar technologies), billing, and resource allocation, with the ability to manage tasks like server provisioning and cost analysis.
- Strong communication skills are essential for collaborating across teams and ensuring smooth project execution. The candidate should be proactive, detail-oriented, and comfortable with technical challenges while keeping projects on track and within budget.

Company Description

The company is a major player in the global tech and e-commerce space, known for its innovative approach and diverse range of services spanning e-commerce, fintech, digital content, and cloud technologies.

With a huge presence in Japan and a commitment to driving growth and transformation, it offers employees the chance to work on cutting-edge projects within an international environment. As a forward-thinking organization, it fosters a culture of innovation, providing opportunities for career growth and collaboration on groundbreaking initiatives.
