Job Description

Top multinational company is looking for application engineer. You will be responsible for developing application tool by using Service-now.

Client Details

Our client is an multinational company known for its diverse range of services and products, primarily in e-commerce, technology, and digital content. You'll have access to various training programs, workshops, and tech conferences, allowing you to stay at the forefront of industry trends and hone your skills. For application engineers eager to innovate and drive change in a fast-paced environment.

Description

- Collaborate with stakeholders (such as product managers, customers, and business analysts) to understand and document application requirements.
- Conduct thorough testing to ensure applications function correctly and meet quality standards. Identify and fix bugs or issues in the software.
- Provide support to users and customers, addressing technical issues and ensuring smooth operation of the applications.

- Monitor application performance, analyze metrics, and optimize applications for speed and efficiency.

Job Offer

- A dynamic, energetic working environment with good work/life balance
- Open culture and job rotation available to enable internal career development
- Competitive salary and benefits package
- Opportunity for growth and advancement within the company
- Collaborative and supportive team environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Ayaka Iwaki at +81 3 6832 8658.

Required Skills

- Experience of Scripting in ServiceNow Fundamentals(SSNF) Application Development Fundamentals(ADF)
 - Strong analytical and problem-solving abilities to troubleshoot issues effectively.
 - Excellent verbal and written communication skills to interact with team members and stakeholders.
