### Job Description

#### Project Engineering & Maintenance Manager

We are looking for 2 positions (1. Project Engineering Manager, 2. Maintenance Manager), but if we found the candidate who have experience and able to handle both roles, we hire only one headcount to be Project Engineering & Maintenance Manager.

**Job Summary:**

- Plan, manage, and control projects related to construction and infrastructure improvement within the company, including installation and enhancement of machinery/equipment, focusing on efficient resource utilization, budget control, and coordination with relevant teams to ensure projects are completed on schedule and meet specified quality standards. Top of Form

**Bottom of Form**
**Responsibilities:**

- Project Planning:** Plan and schedule project timelines for construction, renovation, and enhancement of infrastructure and machinery/equipment within the company.
- Maintenance Planning:** Develop and refine maintenance plans and predictive maintenance schedules based on processed and analyzed maintenance history data to anticipate potential issues and prevent maintenance.
- Budget Management:** Effectively control and manage project budgets, monitor expenditures to prevent budget

overruns.

- **Coordination:** Coordinate with internal and external teams such as engineering teams, maintenance teams, contractors, and equipment suppliers to ensure smooth project execution.
- **Quality Inspection and Control:** Inspect and control the quality of construction work and equipment installation to meet specified standards.
- **Risk Management:** Analyze and evaluate project risks and develop risk management plans.
- **Progress Reporting:** Prepare progress reports and communicate project issues to senior management.
- **Team Leadership:** Provide guidance and advice to engineering and construction teams in the factory to achieve project objectives.
- **Development and Improvement:** Propose new ideas and methods to improve work processes efficiently.
- **Maintenance:** Plan and manage the enhancement of infrastructure and machinery/equipment maintenance in the factory for efficient and continuous operation.

**Qualifications:**

- Bachelor's or master's degree in civil engineering, Mechanical Engineering, Electrical Engineering, or related fields.
- Minimum 5-7 years of experience in project management and maintenance in industrial factories or consulting.
- Experience managing projects for upgrades, developments, or construction of facilities with budgets ranging from 50-100 million baht or more.
- Experience in controlling the installation of machinery/equipment such as **Steam Boilers, Dryers, Coolers, Bucket Elevators, and conveyor belt systems**, or related machinery will be considered advantageous.
- **Management Skills:** Proficient in project management, budget control, and risk management.
- **Industrial Engineering Knowledge:** Understanding of construction processes, renovation, and maintenance of infrastructure and machinery in industrial settings.
- **Maintenance Planning Skills:** Proficient in planning preventive maintenance (PM) and corrective maintenance (CM) activities, as well as ensuring the efficiency of machinery to support production.
- **Communication:** Effective communication skills and ability to present work efficiently.
- **Coordination:** Skillful in coordinating tasks with teams and stakeholders.
- **Leadership:** Capable of leading teams and providing guidance to engineering teams.
- **Analytical Skills:** Strong analytical skills to analyze problems and devise appropriate solutions.
- **IT Knowledge:** Proficiency in using relevant computer programs for engineering and project management tasks.
