Job Description

Position: Supply Chain Manager
Responsibilities:

- Prepare a summary report of the production planning department's KPIs, including root cause analysis and the establishment of preventive and corrective measures.
- Review the department's strategy to use as a basis for setting goals and evaluating the department's performance outcomes.
- Analyze the results of strategic implementation and propose short-term and long-term preventive/corrective measures to management for consideration and execution by subordinates.
- Examine reports on production capacity and raw material assessments to ensure timely product delivery.
- Analyze production plans and procurement of raw materials and related supplies to align with sales volumes.

- Monitor and control production activities to adhere to the plan or delivery schedule.
- Track daily production results to evaluate task success and coordinate with related departments to adjust production plans accordingly.
- Review progress reports on export and pending orders to drive goal achievement.
- Perform other tasks assigned by supervisors.

Qualifications:

- Bachelor's degree or higher in Industrial Engineering or a related field.
 - At least 10 years of experience in production planning, control, and monitoring.
 - Proficiency in English (listening, speaking, reading, and writing); ability to communicate in Korean is an advantage.
- Position: Supply Chain Manager**
