### Job Description

<b><u>Position:</u></b>	<b>Process Engineer</b>
<b><u>Salary:</u></b>	<b>30,000 – 40,000 THB / Month</b>
<b><u>Welfares:</u></b>	<b>Bonus, Life &amp; Health Insurance, OT, company bus and others.</b>
<b><u>Location:</u></b>	<b>Sriracha, Chonburi</b>
<b><u>Working Day:</u></b>	<b>Monday to Friday (and two Saturdays per month)</b>
<b><u>Business Type:</u></b>	<b>Automotive Manufacturing</b>
<b><u>Responsibilities:</u></b>	

- Analyze existing manufacturing processes to identify inefficiencies and bottlenecks.
- Develop and implement new manufacturing processes or improvements to existing ones.
- Design and optimize process layouts, workflows, and equipment setups.
- Conduct process feasibility studies and cost-benefit analyses.
- Continuously monitor and evaluate process performance to identify areas for improvement.
- Implement lean manufacturing principles and techniques to reduce waste and improve efficiency.
- Develop and implement process control systems to ensure consistent product quality.
- Collaborate with cross-functional teams to optimize the overall manufacturing process.
- Select and procure appropriate manufacturing equipment and machinery.
- Oversee the installation and commissioning of new equipment.

- Develop and implement equipment maintenance and calibration procedures.
- Identify and troubleshoot process-related problems.
- Develop and implement corrective actions to address issues.
- Conduct root cause analyses to prevent recurrence of problems.
- Develop and maintain detailed process documentation, including process flow diagrams, work instructions, and quality control plans.
- Prepare reports on process performance, cost analysis, and project updates.

**Required Skills and Qualifications:**

- Bachelor's degree in Mechanical Engineering, Industrial Engineering, or a related field.
- Strong understanding of manufacturing processes and principles.
- Experience with lean manufacturing and continuous improvement methodologies.
- Proficiency in CAD/CAM software and process simulation tools.
- Strong problem-solving and analytical skills.
- Excellent communication and interpersonal skills.
- Ability to work independently and as part of a team.
- Experience in the automotive industry.
- Experience with statistical process control (SPC).
