Job Description

Position: Factory Director/ Production Manager**Responsibilities:**

- Develop and execute factoring strategies that align with the company's overall goals and objectives.
- Oversee the day-to-day operations of the manufacturing department, including production planning, scheduling and resource allocation.
- Monitor production processes to ensure efficiency, productivity, and profitability targets are consistently met or exceeded.
- Implement and enforce quality control measures to ensure that manufactured products meet or exceed customer expectations and industry standards.
- Work closely with cross-functional teams, such as engineering, procurement, and logistics, to ensure seamless coordination and communication throughout the manufacturing process.

- Manage and develop a high-performing manufacturing team, including hiring, training, mentoring, and performance management.
- Ensure compliance with all applicable regulations, industry standards, and quality management systems.

Qualifications:

- Bachelor's degree in engineering or a related field.
- Proven experience in a senior manufacturing management role, with a minimum 8 years of experience in manufacturing operations. Food manufacturing is preferable.
- Strong track record of successfully managing large-scale manufacturing operations, preferably within a complex and highly regulated industry.
- Experience in implementing lean manufacturing principles and driving continuous improvement initiatives.
- Familiarity with relevant regulatory requirements and quality management systems.
- Excellent knowledge of manufacturing processes, technologies, and best practices.
- Demonstrated experience in managing and developing a high-performing manufacturing team.
- Professional certifications, such as Certified Manufacturing Professional (CMP).
