Job Description

COMPANY OVERVIEW

Our client is a life sciences service provider, empowering medical and pharmaceutical industry with reliable healthcare services and solutions. They operate globally with a strong presence in Asia Pacific region.

They are in search of a Project Manager.

JOB RESPONSIBILITIES

- Lead the project team as the project manager, ensuring development is completed on time, within scope, and to high-quality standards.
- Manage various maintenance support activities for web services, including application upgrades, bug fixes, feature enhancements, system/application deployments, and user support.

- Collaborate with technical leads to provide task management, technical mentoring, and guidance to team members, ensuring successful implementation and improvement of practices.
- Coordinate with other teams to achieve development goals.
- Stay current with industry trends, conduct proof of concepts (POCs), and research and development (R&D).
- Respond to incoming technical inquiries from internal teams.
- Work with the quality assurance manager to coordinate testing cycles for assigned services.
- Use database queries, log analysis tools, and other related tools to analyze performance indicators and evaluate experiments.
- Assist the team leader and/or immediate supervisor in defining core technical solutions and provide recommendations on software frameworks or architectures.

JOB REQUIREMENTS

- Bachelor's degree in computer science, information technology, or a related field.
- PMP or CSM certification (preferred).
- 3+ years of experience in a company offering online services with medium to large web-based, public-facing applications.
- 3+ years of hands-on experience as a web application project manager, overseeing the assessment, implementation, testing, and analysis of UI/UX designs and strategies.
- 3+ years of experience as a web application software engineer. Proficiency in most of the following: .NET, ASP.NET, and C#, Cloud platforms (Azure, AWS), MS SQL, HTML, JavaScript, Bootstrap, Restful API, Web API, Jira, Confluence, OWASP
- Experience with various development methodologies (Agile, Waterfall, Incremental, etc.).
- Proven ability to work with cross-functional teams.
- Ability to manage multiple projects simultaneously and prioritize tasks effectively.
- Strong problem-solving skills and the ability to make sound decisions in a fast-paced environment.
- Ability to write and maintain technical documentation.
- Strong leadership, communication, and interpersonal skills.
- Team player with strong analytical skills and a positive attitude.

Working Location: Singapore
