### Job Description

**COMPANY OVERVIEW**

The company specializes in designing, sourcing and delivering furniture and flooring products

**JOB RESPONSIBILITIES**

1. Enforce and ensure the organization's quality standards and protocols.
  - Ensure that all products are manufactured in line with specified standards for quality and that these follow the customer-specific safety and material requirements specified in the technical documents, approved samples, and swatches.
  - Conduct internal tests like drop test, stability test, impact test, UKFR burnt test, rubbing test for colorfastness, etc. on products/packages that are confirmed to live up to a specified standard, whenever specified.
  - Perform all duties consistently in accordance to the guidelines and work ethics of this company.
2. Inspection of products and preparing reports
  - In accordance with company's standards, produce and maintain accurate and comprehensive inspection reports of all POs delivered to the customers timely.
  - Inspect the products based on the agreed quality requirements during product development and pre-production stage.
  - Strictly adhering to all the checkpoints on the QC checklist when performing inspections, making sure that AQL inspection samples are always taken in a random manner.
  - Always equipped with the required QC measuring instruments and tools for inspections.

- QC to review the defects found during inspection with the key personnel from the factory.
  - Report abnormal situations that happened at the factory or any non-conforming products to the respective Quality personnel.
  - Ensure that all technical documents, approved samples and swatches are available during final inspection.
  - Maintain a set of company-approved samples and swatches and ensure that these are kept safely.
3. Managing products claim and development ideas
- Working together with the QA and Quality Manager to reduce the claim rate.
  - Proactively identify potential areas for improvement at the factory and report back to the QA Engineer.
  - Routinely engage suppliers in discussions of the findings during the inspections after the inspection is complete.

**JOB REQUIREMENTS**

- At least 2 years of product quality inspection experience (Furniture/Building)
- Have good experience in factory and process audit
- At least Diploma education specialize in Quality Management, Engineering or equivalent
