### Job Description

We are a key player in the precision manufacturing industry which specializes in high-tech components for semiconductor, electronics, and renewable energy fields. We are now looking for an enthusiastic and driven Technical Section Manager to join our ever-growing team!

**Job Descriptions**

- Overseeing the surface treatment processes including cleaning, polishing, anodizing, passivation, and finishing
- Managing a team of engineers and technicians, coordinating with other departments
- Continuously improving metal surface treatment operations to meet company goals and customer specifications
- Ensure compliance with industry regulations and environmental standards, while also driving innovation and process optimization.
- Promote a culture of safety, quality, and continuous improvement within the team
- Ensure all processes are optimized for efficiency, cost effectiveness, and quality output.
- Conduct regular audits and risk assessments to identify and mitigate potential hazards in the surface treatment area

**Job Requirements**

- Bachelor's degree in Metallurgical Engineering, Materials Science, Chemical Engineering, or a related field.
- Minimum of 7-10 years of experience in metal surface treatment or a related field.
- In-depth knowledge of metal surface treatment processes, including electroplating, anodizing, passivation, and coating techniques

- Familiarity with industry standards, regulations, and best practices in metal surface treatment.
- Experience with quality management systems (e.g., ISO 9001) and continuous improvement methodologies (e.g., Lean, Six Sigma)

If this opportunity sounds of interest to you then please send your resume to the quick apply button at the bottom of this page.
