### Job Description

#### Company and Job Overview

We are a medical device company that specializes in the manufacturing of orthopedic implants and instruments. While working hand-in-hand with our OEMs in creating alternatives to improve quality of life for the community, we aim to establish mutually constructive, profitable and promising partnerships with orthopedic OEMs in the market. Join us as Machinist to be a part of our Technical team, with opportunities for training and growth!

#### Job Responsibilities

- Perform all machining operations based on set up sheet, job router, Inspection Plan and QMS document in order to deliver quality products
- Ensure that regular maintenance is conducted in a planned and timely manner.
- Perform first piece inspection after tool change for affected dimension
- Maintains specifications by observing drilling, grooving, and cutting, including turning, facing, knurling and thread chasing operations; taking measurements; detecting malfunctions; troubleshooting processes; adjusting and reprogramming controls; sharpening and replacing worn tools; adhering to quality assurance procedures and processes
- Sets-up mills/lathes/wirecut by installing and adjusting three- and four-jaw chucks, tools, attachments, collets, bushings, cams, gears, stops, and stock pushers; indicating vices; trammig heads.

- Protect and re-use used cutter in order to encourage cost saving and minimize wastage in the production

Job Requirements

- Min SPM or vocational school (PSDC). Diploma in Engineering will be an added advantage.
- Understanding of CNC machining, GD&T, and control of product quality
- Min 3 years of experience in medical device manufacturing
