Job Description

Our client is a dynamic and growing company specializing in the engineering and manufacturing of transport and infrastructure solutions. They provide engineering solutions for large-scale construction projects, including bridges, roads, and other infrastructure. Additionally, they offer services for the maintenance, repair, and upgrading of existing infrastructure and transport systems.

They are currently seeking a dedicated Mechanical/Electrical Engineer to join their engineering department and support their client operations. In this role, you will be responsible for supporting unloading operations and performing maintenance site work. Your position will involve hands-on tasks to ensure efficient and effective operations, as well as collaboration with other team members to achieve project goals.

Key Responsibilities:

- Assist in coal unloading operations and maintenance tasks at the site.
- Perform routine inspections and maintenance of electrical and mechanical systems.

- Troubleshoot and resolve technical issues promptly.
- Collaborate with the engineering team to ensure optimal performance of equipment and systems.
- Prepare and maintain documentation related to maintenance and operational activities.
- Adhere to safety standards and company policies.

Requirements:

- Diploma in Electrical or Mechanical Engineering
- Min 2 to 5 years of relevant working experience
- Basic knowledge of electrical and mechanical systems
- Strong problem-solving skills
- Good communication and teamwork abilities
- Required to often go site located in Klang and Port Dickson
- Familiarity with safety standards and maintenance procedures
