Job Description

Lead technical efforts to design, implement, and maintain a robust IT infrastructure. Focus on network and server operations, virtualization, security, and troubleshooting.

Client Details

Our client is a prominent player in the financial services industry, providing innovative financing and insurance solutions to customers. They are dedicated to leveraging technology to enhance customer experiences and maintain high operational standards.

Description

- **Network Engineer:**
 - Provide network infrastructure services, including security, monitoring, and directory services.
 - Document network topology and configurations.
 - Troubleshoot network connectivity and utilization issues.
 - Develop technical specifications for purchasing networking equipment.
- **Server Engineer:**

- Manage storage, server virtualization, and system monitoring.
- Create documentation for server configurations.
- Analyze server outages and perform root cause analysis.
- Specify technical requirements for server procurement.
- Collaborate with global team members and stakeholders.

Job Offer

- Opportunities for professional growth and skill development.
- A collaborative and diverse working environment.
- Exposure to global projects and state-of-the-art technologies.
- Great work life balance: 2 days remote work.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

Required Skills

- Minimum 3 years in IT infrastructure, network, or server engineering.
 - Hands-on experience with server virtualization (e.g., VMware) and backup/restoration.
 - Proven troubleshooting skills for network and server issues using Linux.
 - Leadership experience in a global environment.
 - Language level: Japanese (Business level +), English (Business level +)
-
