Job Description

Company Profile

- A Japanese fintech company providing cloud-based financial management solutions for individuals and businesses. The company is rapidly expanding globally and you will play a key role in stabilizing the infrastructure and improving development productivity to support future growth. This is an opportunity to make strategic decisions and accelerate business growth in an environment where technology and business are closely aligned.

The Role

- 1: Stable operation and improved availability of the infrastructure
- To maintain high availability and prevent major failures, enhance system monitoring and rapid incident response. Implement specific initiatives (e.g., maintenance of Datadog dashboards) to promote stable operation.
- 2: Accountability for infrastructure
- Understands the content and progress of operations, including the scope delegated to subordinate managers, and fulfills accountability as appropriate. Also, provide clear guidelines on the optimization of infrastructure costs and the

scope of management of AWS, etc., to support efficient operations across departments.

- 3: Platform Engineering Strategy Development
- Aiming to improve developer experience and productivity, we draw a roadmap for platform engineering and develop a vision for the future together with the CTO, VPoE, and CISO.
- 4:SRE team organizational management and member development
- We assign a clear scope of responsibility to each manager and support them to ensure that the results are achieved within six months. As the team grows, we will build a stronger foundation.

Your Skills

1. Leadership and Management: Execution skills to bring multiple teams together and lead projects to success, and staffing skills to promote organizational growth. Drives change, builds trust with management and other departments, and supports consensus building.
2. Problem-solving skills: Analyzes complex issues and works with teams to derive optimal solutions.
3. Communication skills: Builds relationships of trust with management and other departments, captures their intentions, and leads them to consensus building.
4. Problem-solving skills: Able to analyze complex problems in cooperation with others and lead to appropriate solutions:
5. Technical background:
 - Building and operating container environments using Kubernetes
 - Experience in building and operating infrastructure on AWS
 - Design, operation, maintenance, improvement, and fault handling of web services
 - Knowledge of Site Reliability Engineering
 - Experience managing an organization with DevOps culture

Location

Tokyo

Salary

17 - 20 million yen

Selling points

- We are looking for a Product Infrastructure Manager who will be responsible for the entire infrastructure of the services we provide to our users in the midst of rapid growth.

Reference Number: 06940-0013117140
