Job Description

Drive transformative cloud migration projects as a Senior DevOps Engineer, focusing on Kubernetes, automation, and cloud architecture. Collaborate with global teams to design scalable, secure, and reliable cloud solutions.

Client Details

Our client is a leader in the e-commerce and tech industry, dedicated to innovation and excellence. They offer a dynamic, global work environment with opportunities to work on advanced cloud-based infrastructure projects.

Description

- Design, implement, and maintain DevOps pipelines for cloud-based applications and services.
- Lead cloud migration projects, including architecture planning and implementation.
- Automate and optimize infrastructure using Kubernetes, Terraform, and Ansible.
- Manage CI/CD pipelines using tools like Jenkins and GitLab CI.
- Collaborate with cross-functional teams to enhance system scalability and security.

Job Offer

- Opportunities for long-term employment.
- Weekends and holidays off, with a 9:00-17:30 work schedule.
- Free meals for breakfast, lunch, and dinner.
- Hybrid working style

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

Required Skills

- At least 7 years of experience in DevOps or related roles.
- Proficiency in cloud platforms (AWS, GCP, or Azure) and Kubernetes.
- Expertise in containerization (Docker) and IaC tools (Terraform, Ansible).
- Strong scripting skills (Bash, Python, or Ruby) and CI/CD pipeline management.
- Bilingual proficiency: Business-level for both Japanese and English.

Company Description

The client is a leader in the e-commerce and tech industry, dedicated to innovation and excellence. They offer a dynamic, global work environment with opportunities to work on advanced cloud-based infrastructure projects.
