Job Description

This role is for a Technical Lead specializing in Java, Spring Boot microservices, and cloud technologies, responsible for leading project activities, performing design/code reviews, and delivering innovative solutions for a prominent life insurance customer. The position offers a hybrid work style and requires bilingual proficiency in English and Japanese (N3 level).

Client Details

The client is a prominent organization in the life insurance sector, known for its innovative approach to providing reliable financial solutions. They prioritize cutting-edge technology and seamless customer experiences, making them a key player in the industry.

Description

- Lead technical development using Java, Spring Boot, and microservices architecture.
- Oversee design and code reviews to ensure quality and adherence to best practices.
- Drive project activities and manage teams to deliver on objectives effectively.
- Provide technical solutions and multiple approach recommendations to stakeholders.
- Communicate and clarify project requirements with the business team, coordinating between onshore and offshore members.

- Utilize cloud technologies (e.g., AKS) and DevOps CI/CD pipelines to streamline development and deployment.

Job Offer

- A competitive salary package aligned with market standards and the candidate's expertise.
- A hybrid work environment offering flexibility with opportunities to work both remotely and on-site.
- Exposure to advanced technologies like Spring Boot microservices, cloud platforms, and DevOps, enabling continuous skill enhancement.
- A strong potential for career progression, including the possibility of transitioning to permanent employment.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Aldiyar Arslan at +813 6832 8925.

Required Skills

- A seasoned developer with at least 5 years of hands-on experience in Spring Boot microservices, backend engineering, and technical leadership.
- Proficient in Java, cloud platforms, and tools like AKS, with the ability to handle design, code reviews, and customer interactions effectively.
- A bilingual professional with English fluency and Japanese proficiency (N3 level>>negociable), capable of collaborating across teams and bridging communication between stakeholders.
