Job Description

COMPANY OVERVIEW

A Japanese independent IT company that provides software products and solutions, with a particular strength in development support tools.

Their goal is to help companies and users succeed based on their philosophy of "Helping the world".

They provide a variety of solutions to improve digital operations in a wide range of industries and occupations by proactively incorporating no-code and low-code technologies that enable system construction without IT expertise and software development support tools that have sold a cumulative total of 1.2 million licenses. They also have more than 30 years of experience in providing business systems that support school management, which have been introduced in more than 3,600 private schools nationwide, and business systems for nursery schools and other social welfare facilities.

JOB RESPONSIBILITIES

As a Product Engineer, you will be responsible for the development of "Developer Support Tools".

You will be in charge of productization (especially Java Script) of development support tools sold in Germany and Europe, as well as technical research and planning for new product releases. Specifically such as,

- Define requirements and functional requirements for JavaScript libraries and Visual Studio-compatible .NET components that meet the needs of the German and European markets
- Examine new functions and functional improvements that will contribute to increasing the development efficiency of business systems for Germany and Europe
- Coordinate development schedules, functional requirements, and specifications with overseas product development teams, and confirm completed product functions.
- Create English and German language product content, such as English manuals and samples, and review and create content to make the product easier for German and European developers to understand and use.
- Respond to feedback and support requests from the customer service and sales departments.
- Plan and propose new products and services In cooperation with the product manager, plan and propose new products and services based on information on new technologies such as development tools, frameworks, and cloud computing, as well as information on the needs of information system development.

Points of Attraction

Vision for Germany

-The company's vision is to be of service to the world. Their mission is to strengthen marketing, sales, support, planning and development for the further development of Europe and its developers, where DX is making remarkable progress.

-As a second founding member in Europe, you will join our team during the period of corporate transformation, when we will incorporate the company in the next fiscal year.

-As a start-up company, you will have the opportunity to use your experience in a wide range of areas.

-You will be able to work in a global environment, collaborating with team members in Japan, the U.S., and other countries. (English is the main language used in the company, but Japanese is also acceptable.)

JOB REQUIREMENTS

COMPETENCY ("Must") *Must meet all of the following requirements

· 2+ years of experience developing enterprise web application systems · Experience in technical support of enterprise software or information systems, or creating user documentation such as manuals

Welcome Requirements

<English and German language skills>

- Understanding of internal and technical documents written in German and English
- Experience in responding to emails in German and English in German and English
- Experience giving presentations in German and English

<Experience with one or both of the following technologies>

- Experience developing enterprise systems using JavaScript (high priority), .
- Experience in development using Angular, React, or Vue.js frameworks

<The Right Person for the Job>

- Interested in IT technology trends and willing to actively and proactively adopt them.
- Those who are tenacious and can do whatever it takes to the end with determination.
- Those who can work autonomously rather than waiting for instructions, such as asking for instructions with their own ideas.
- Teamwork oriented and able to communicate smoothly with colleagues and customers.

BENEFITS

- Paid vacation 30 days

- Working hours: 40 hours/week

※During the start-up period, employees are required to come to work, but after stabilization, hybrid work can be considered.

- Working hours: 8:00-17:00

※Flexible depending on the availability of tasks.

- Full-time employment

- Bonus paid

- Flex Time system

- Transportation expenses not included

- Location: Düsseldorf
