Job Description

【ABOUT THE COMPANY】

The company has raised approximately 1.4 billion yen in equity from Globis Capital Partners, the University of Tokyo Edge Capital Partners, and Global Brain, and 1.6 billion yen in debt (including lines of credit) from financial institutions, bringing its cumulative total raised to approximately 3 billion yen.
Based on these funding sources, the company is committed to the early realization of the Whole Product concept, which aims to deliver the best customer experience to users in the commercial real estate industry, and to further promote the digital shift in the commercial real estate industry, thereby contributing to the development of the Japanese economy.

【JOB DESCRIPTION】

Responsibilities
Identify points that are unclear when considering requirements and understand what users are looking for through PdM.
Design and implement improvements to estie market that address user needs
Understand the current code base of estie pro and proceed with implementation of functions while considering future scalability
Implement UI/UX improvements based on various qualitative and quantitative research (log analysis, etc.)

Recruitment Background
The company is developing its business with multiple products in order to promote DX in the entire commercial real estate industry with a focus on office real estate. In order to grow the business by developing multiple products, it is necessary to develop MVPs at high speed and repeat hypothesis testing. With the recent rapid growth in the number of installations, the number of new products we want to develop has increased, and the company is looking to increase the number of members who will be involved in the launch of these products. Would you like to take advantage of your past experience and take on the challenge of developing products from 0 to 1 and from 1 to 10?
