### Job Description

#### QUALITY MANAGER

Our client is a world-class leader in providing innovative solutions and services in data center construction and engineering. Their mission is to deliver high-performance, scalable, and secure infrastructure for businesses across the globe.

- Part of a global network with over 100 offices worldwide.
- A trusted partner in delivering data center solutions across key markets.

#### JOB RESPONSIBILITIES:

- Preserve and enhance the QMS and associated records.
- Comply with Integrated Management System (IMS) certifications and recommendations for QMS.
- Oversee audit frameworks and certification strategies.
- Manage certification audits and carry out internal audits.
- Create and maintain a database for audit results and remedial measures.
- Consolidate different management systems under IMS to increase compliance and efficiency.
- Preserve and enhance document management and instructional documentation systems.
- Oversee reporting and Key Performance Indicators (KPIs) for quality management.
- Provide management reviews and reporting assistance to the Senior Director of Quality & Accreditation.
- Support departments in upholding accurate documentation and high standards.
- Raise awareness of QMS and certifications across the organization.

**JOB REQUIREMENTS:**

- A Bachelor's degree or comparable work experience.
- A solid grasp of certifications and management systems.
- Many years of quality management experience.
- It is advantageous to have relevant training or credentials.
- Fluent in English; being multilingual is advantageous.
