Job Description

DESIGN & COST ESTIMATION MANAGER

Our top-tier global engineering client specialises in advanced technologies related to air and water systems. With a strong focus on environmental sustainability, the company has developed innovative solutions to meet the evolving needs of its customers:

- **Environmental Responsibility:** This includes the development of energy-efficient systems and the adoption of sustainable materials and processes.
- **Commitment to Quality:** By leveraging cutting-edge technology and adhering to stringent quality standards, the company ensures reliable and efficient solutions.

JOB RESPONSIBILITIES:

- Oversee the planning, budgeting, and building of projects including **cold rooms** and **air conditioning/refrigeration** facilities.
- Carry out a variety of **computations**, including "**ventilation calculation**" and "**air conditioning load calculation**," and creates precise drawings.
- Determine the overall budget using estimating work, and make sure that all design drawings adhere to all applicable safety, regulatory, and industry requirements.
- Collaborate closely with fellow team members and collaborate while receiving guidance from upper management.
- Create, evaluate, and offer technological solutions for commercial air conditioning systems.
- Create project proposals and cost estimates for project management and bidding.

JOB REQUIREMENTS:

- At least **5 years of experience** in the **construction industry** with **design** and **costestimation**.
- Previously worked on projects involving **cold rooms** and **air conditioning/refrigeration facilities** will be beneficial if you have project experience in a related field.
- Strong communication skills.
