Job Description

Software Engineer (C++/ Python)

Growing high frequency trading company seeking dedicated and professional C++ or Python Software Engineer to join their dynamic team. If you are, passionate about coding, highly skilled in using established software development techniques, and capable of maintaining and enhancing our existing software applications, this role might just be your dream job.

Job Descriptions:

- Implementing and maintaining applications and components within our existing software systems
- Enhancing existing application features, while considering performance and future scalability
- Writing clean, well-documented, and easily maintainable code
- Taking end-to-end responsibility for the software components you maintain, from implementation to ongoing production support
- Documenting your work and updating relevant documents as required

Job Requirements:

- At least 3 years of experience in C/C++ programming in a Linux environment
 - A strong background in data structures and object-oriented programming in C/C++ / Python
 - Good knowledge of programming low-level, high-performance, clean and high-quality code
 - Good understanding of various build systems such as g++, make and cmake
 - Exposure to Python or a willingness to quickly become proficient
 - Good knowledge in STL and modern C++ such as smart pointers
 - Experience in low-latency programming or real-time systems
- Software Engineer (C++/ Python)
