Job Description

Overview about this role:

We are seeking a **Regional Application and Design Engineer** for Mechanized Car Parking Systems to drive innovation and efficiency in our parking solutions. This role involves designing customized systems, providing technical expertise, and ensuring seamless project execution.

Location to work: Shah Alam, Selangor

Job Responsibilities:

- Develop and design tailored Mechanized Car Parking Systems using AutoCAD or similar tools.
- Provide technical support to clients, sales, and installation teams.
- Coordinate with manufacturing and project teams to ensure timely delivery and compliance.
- Implement quality control measures and conduct audits.

- Stay updated on technological advancements and integrate new solutions into designs.
- Develop training programs and conduct market research to enhance product offerings.

Job Requirements:

- Bachelor's degree in Mechatronic, Mechanical, Civil Engineering, or related field.
- **2-5 years of experience in designing mechanical systems, preferably in the automotive or parking industry.**
- Proficiency in CAD software (**AutoCAD**, SolidWorks) and strong engineering analysis skills.
- Proven project management experience from concept to execution.
- Excellent communication and problem-solving abilities.
