Job Description

Job Overview:

You will be responsible for supporting all aspects of logistics software, and operations, ensuring smooth and efficient technology support for our users and business needs. Will be involved in the implementation and development of new solutions such as WMS, TMS or any other logistics / supply chain solutions.

Job Responsibilities:

- **Project Planning and Management:** Develop project plans, including scope/requirement, proposal, timelines, and resource allocation.
- **Business Requirement Gathering:** Collect the functional requirements and specifications to gain a comprehensive understanding of client expectations and constraints, laying the groundwork for major technical development projects.
- **Team Management:** Lead and motivate project teams, ensuring all members understand their roles and responsibilities. Foster a collaborative and productive team environment. Lead also all recruiting activities across teams.
- **Resource Management:** Allocate resources efficiently and manage team workloads. Ensure the availability of necessary documents and information for the projects.
- **Risk Management:** Identify potential project risks and develop mitigation strategies. Monitor and manage risks throughout the project lifecycle.
- **Quality Assurance:** Ensure that all deliverables meet quality standards and client requirements. Conduct regular

reviews and assessments to maintain high-quality outcomes.

- **Development Methodologies:** Apply Agile project management principles, such as Scrum or Kanban, to enhance project efficiency and adaptability.
- **Documentation:** Maintain comprehensive project documentation, including project plans, job brief, status reports, and change requests.
- **Continuous Technological Advancement:** Stay abreast of evolving technologies through relentless research, strategically incorporating new advancements into the technical architecture and application framework development.

Job Requirements:

- **Candidates must possess at least Bachelor Degree, Professional Degree or Master's Degree preferably in Information Technology or any other equivalent.**
- Proficiency in one or more programming languages (e.g. .Net, C#, Java, JavaScript or any other object-oriented programming languages).
- 5+ years of experience in software full-cycle development project management and people management experience
- Experience in development for logistics or supply chain management software.
- Excellent communication skills, Problem-solving skills, Positive and professional demeanor to build rapport with colleagues and ensure a satisfactory customer experience.
- Excellent knowledge of logistics / supply chain management.
- Proficiency in one or more relational database (e.g. Oracle, MySQL, any other relational database).
- Experience in cloud computing (e.g. Amazon Web Service, Microsoft Azure Cloud).
